

IN THE SPECIFICATION:

Please substitute the following paragraph for the paragraph starting at page 6, line 24 and ending at page 7, line 6. A marked-up copy of this paragraph, showing the changes made thereto is attached.

A1 --Specifically, according to one aspect of the present invention, there is provided a remotely controllable apparatus which has a control panel for specifying a processing operation and which is operated in accordance with an indication from the control panel and/or an externally supplied command, characterized in that the apparatus has storage means for storing control-panel data representing an external appearance of at least principal portions of the control panel.--

Please substitute the following paragraph for the paragraph starting at page 10, line 8 and ending at line 15. A marked-up copy of this paragraph, showing the changes made thereto is attached.

A2 --The present invention will now be described in detail with reference to the drawings. Though the following embodiment is described in regard to an example in which a copier (referred to as a "fax/copier" below) having a facsimile function is used as an apparatus to be controlled by the user, the present invention is applicable in other types of image processing apparatus as well.--
